

War and Appendage...

Unfortunately Instagram took my 'War and Penis' picture down I posted the other day as it violated their rules and regulations because it contained the word, "Penis". Sadly however, people posting pictures of Donald Trump (who is a Penis) are still deemed to be acceptable.

That's justice for you.

(Personally his orange, scrotum effect face offends me more than the word Penis...maybe I should have used the word appendage. Doesn't quite have the same ring to it though does it, "War and Appendage"...))
